Education

PES College of Engineering | B.E. in Computer Science | CGPA: 8.6 / 10.0 | 2023 – 2027

- Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Database Management Systems (DBMS), Computer Networks.

Technical Skills

Languages: Python, Java, C++, C, SQL, HTML/CSS/JavaScript
Developer Tools: Docker, Git, GitHub, Azure DevOps, Jira, VS Code
Frameworks & Libraries: Flask, ReactJS, Bootstrap
Core Concepts: CI/CD Pipelines, RESTful APIs, System Design Basics, Agile Methodologies

Experience

Employability.life

Aug 2025 – Sep 2025

DevOps Engineer Trainee (Azure Initiative)

Remote

- Engineered CI/CD pipelines using **Azure DevOps**, effectively reducing manual code deployment time by **40%** and ensuring consistent integration across environments.
- Implemented **Docker** for application containerization, eliminating environment dependency errors ("works on my machine") and standardizing development workflows.
- Managed sprint tasks and bug tracking via **Jira**, enhancing cross-functional team coordination and improving project delivery velocity by **20%**.

Projects

Eco-Meter | Python, Analytics, Web Technologies

- Developed a real-time sustainability tracker that aggregates energy usage data to provide actionable eco-friendly recommendations to users.
- Engineered a dynamic analytics dashboard using **JavaScript** to visualize environmental footprint metrics, improving user data readability and engagement.
- Optimized backend data processing algorithms to handle real-time inputs, enabling instant feedback loops for energy consumption monitoring.

Hostel Gatepass System | Flask, SQLite, Bootstrap

- Architected a Role-Based Access Control (RBAC) system, securing permissions for **4 distinct user roles** (Student, Warden, Parent, Security) to ensure data integrity.
- Designed a responsive, mobile-first interface using **Bootstrap**, facilitating seamless access for users on mobile devices and reducing UI latency.
- Streamlined the gate pass approval workflow by digitization, effectively reducing manual paperwork processing time by approximately **50%** for administrative staff.

Trip-Nest | HTML5, CSS3, JavaScript

- Built a high-performance Airbnb-style booking interface featuring dynamic search and filtering capabilities for property listings.
- Implemented advanced DOM manipulation techniques to achieve smooth page transitions and interactive booking components without page reloads.
- Enhanced frontend rendering performance, ensuring sub-second load times for image-heavy property listings through optimized CSS and efficient script handling.

Certifications & Awards

- 2nd Runner-up, Technovate for India Conclave:** Recognized for technical innovation and problem-solving excellence among competitive engineering teams (2024).
- Cybersecurity Virtual Internship (AICTE):** Gained practical exposure to network security protocols and vulnerability assessment (2023).
- Certifications:** Python Programming (Infosys SpringBoard), Cyber Security: Mobile Security (Coursera).

Leadership & Co-curricular

- Social Media Lead, Teraforum:** Directed digital outreach strategies and community engagement initiatives, increasing platform visibility.
- Graphic Designer, NEURACARE AI:** Collaborated with product teams to design visual assets, translating technical concepts into accessible user-facing graphics.
